

SPECIALITIES ACOUSTIC LAMINATES

INNOVATIVE PRODUCTS

The key to success is to focus intensively on Research & Development which enables Isovolta AG to offer innovative products with a technological competitive advantage to the market. Isovolta's customers benefit enormously from this constant development of new acoustic laminates. Due to our approach to create new products of high-quality, Isovolta AG has become technology leader on the market.

A highly modern laboratory, a young and motivated team, optimized processes and close partnership and cooperation with our customers and suppliers are the foundations for Isovolta's strongly application oriented innovative strength.

Our future is shaped by technology and innovative products."

CUSTOMERS

Isovolta AG is able to adapt its unique products in order to meet the individual requirements of our customers. As a leading manufacturer of acoustic laminates we are able to offer tailor-made solutions. The main goal is to identify the needs of our customers and to assist with many years of expertise to find the most efficient way to success.

In close collaboration, Isovolt supports its customers from development phase until mass production. One of the crucial factors in this highly dynamic and fast-driven market is speed. Every day, Isovolt proves to achieve very short response times and fast sample testing for its customers.

The willingness to perform and the ability to be the No. 1 on the market for acoustic components is part of the corporate culture of Isovolt. The immediate implementation and realization of projects are the basic requirements for Isovolt's success in the future.

A qualified team of engineers and a dynamic and world-wide acting sales team are in close contact with our customers to further develop new and long-lasting products and relationships. Flexibility and the ability to identify the needs of the customers are main drivers for Isovolt.

*With Isovolt as a partner –
Be the fastest on the market.”*

PROCESSING

Isovolta is able to provide rolls in all kind of sizes and formats according to the needs of our customers.

We continuously optimize our processes and control the output in order to guarantee process stability and the highest quality of our products.

The know-how of more than 60 years in laminating and producing all kind of different multifunctional composite materials makes us the preferable supplier throughout the world.

A combination of a strong partnership to our customers and innovative products defines the success of Isovolta in the acoustic business.

For the acoustic laminates Isovolta is basically able to process all kind of different film materials (PC, PET, PEN, PEI, PEEK and many more) with a special damping layer to a high-end multi-layer laminate.

QUALITY

Our raw materials are being tested by our well-trained engineers in order to guarantee the high quality of our laminates. In our laboratory, we have several state-of-the-art devices to measure the specified values for our products.

In our lamination process, Isovolta uses the highest quality control standards, permanent process data recording and process visualization in order to maintain the high quality of our products.

*All Isovolta laminates are
made to pursue perfection."*
