The idea of **environmental protection** has become increasingly important in our society in recent decades and the protection of the environment is also very important in our company. As a globally active production company, it is our intention to act sustainably and in an environmentally friendly manner. For this reason, an integrated **quality and environmental management system** has been introduced in all our Group companies.

We at ISOVOLTA AG want to ensure that the topic of environmental protection is implemented and continuously improved in all processes of our company. With the following quality and environmental policy of our company, we want to inform customers, suppliers, the interested public, authorities, associations as well as our employees about our quality goals and goals in **environmental protection**.

Our focus is on the high **quality** of our products and services. The highest standards of **customer satisfaction, environmentally friendly and energy-efficient production processes, occupational safety and the best possible health protection** are the basis for the sustainable development of our company.

Quality, environmental protection and occupational safety are also an integral part of the company's compliance with legal requirements and the consideration of the requirements of our customers are the basis of a process-oriented management system.

The **satisfaction** of our employees is one of the most important corporate goals. Our employees play a key role in terms of quality, occupational safety and environmental protection, as well as ensuring the satisfaction of internal and external customers. Each individual is involved in the achievement of the goals and a continuous improvement system is the basis for long-term positive development.

In the development of our products and services, the focus is on **quality, resource efficiency as well as occupational health and safety**. A forward-looking development process is the methodological basis for innovation and research.

In achieving our goals in the areas of quality, environmental protection and occupational safety, we are in constant and intensive dialogue with employees, suppliers, customers, associations and authorities, and the resulting demands are our motivation.

The regular evaluation of our goals, defined measures and a comprehensive risk assessment are incorporated into the strategic work and orientation of the company.

Through this declaration, the management and all employees undertake to act in accordance with the principles of this quality, environmental and occupational safety policy.
