

ENVIRONMENTAL POLICY

ISOVOLTA SAU, part of the ISOVOLTA GROUP (CONSTANTIA INDUSTRIES HOLDING), represented by Mr. Aleix Anglès and Mr. Ferran Vallmitjana, declares its commitment to environmental protection and continuous improvement, with special attention to the impacts derived from its activities in the transformation of electrical insulating materials.

Commitments

- 1. Environmental protection and pollution prevention**
Apply processes, materials, and practices that avoid, reduce, or control environmental impacts, prioritizing prevention over correction.
- 2. Commitment to climate change**
Recognize climate change as a relevant factor in our environmental context, promoting measures that reduce our carbon footprint through efficient energy use, responsible resource management, and sustainable selection of materials and suppliers.
- 3. Legal compliance and other requirements**
Ensure compliance with all applicable environmental legislation, as well as other voluntary commitments undertaken by the organization.
- 4. Continuous improvement of environmental performance**
Review and optimize our performance through measurable objectives and action plans, supervised annually in the Management Review.
- 5. Management of environmental aspects and life cycle approach**
Identify and control significant environmental aspects at each stage of the life cycle of our products and processes, from raw material acquisition to final disposal.
- 6. Leadership, resources, and responsibilities**
Top Management assumes responsibility for the environmental management system, providing the necessary human, technical, and financial resources and promoting an active environmental culture.
- 7. Awareness, training, and internal communication**
Inform, train, and empower all individuals working in or for the organization to ensure their commitment to this policy.
- 8. Stakeholder engagement and external communication**
Listen to and consider the environmental expectations of customers, suppliers, authorities, and society. This policy will be public and available to any interested party.
